COMMODITEL'S CONNECTIONS SURGE TO REACH DECEMBER MILESTONE

CommodiTel Limited (ASX: CMO) has reached customer subscriptions of 45,000, well before its predicted end of December milestone.

This achievement is a result of the Company's recent internet based acquisition program which continues to work extremely well. This has been as evidenced with triple digit growth which is occurring with subscriber connections.

Commenting on the result, Managing Director of CommodiTel Limited, Mr George Gelavis, said:

"Reaching 45,000 connections almost two months ahead of schedule shows our on-line acquisition strategy is proving very successful. We're very pleased to have reached this milestone. Revolution has followed the lead of the discount MVNO market in Europe, which recorded significant growth. What our consumers really want at the end of the day, are easy to use, low cost call rates and Revolution is delivering into this need.

"We are very encouraged about what lays ahead and believe this recent success will demonstrate that our business model is sustainable in Australia. We have a growing band customers and our referral program is picking up significant momentum.

"We are also on target with the launch of Infinitel Pty Ltd's Gametel branded service we announced last month and expect to see this product in the market place prior to Christmas. This should provide a further boost to our customer numbers."

About CommodiTel:

CommodiTel Limited (ASX: CMO) is a new type of Telco with a low-cost business model that has already had a major impact in both the European and US telecommunications market. It has positioned itself as a service provider to retailers who wish to offer their customers the benefits of their own branded and priced telecommunications, without the costs and risks of establishing and managing their own network.

They are the first dedicated pre-paid Mobile Virtual Network Enabler (MVNE) in Australia.

MVNE's allow retail operators to set-up their own mobile telephone network without the massive infrastructure and capital costs normally associated with being a telco.

In Australia, CommodiTel is also pioneering pre-paid discount mobile SIMS exclusively over the Internet, through its wholly-owned division Revolution Telecom. By keeping distribution and cross-subsidy costs to a minimum, Revolution Telecom is able to offer some of the cheapest mobile rates in Australia.
